

IDEAS FOR USING THE CARDS

The aim of these cards is to enhance and embed continuous quality improvement across all aspects of provision. The cards can support practitioners in aspiring, middle and senior leadership roles when working one-to-one as well as when working with small groups, departmental teams and delivering whole organisation interventions.

These cards are part of a wider [toolkit](#) developed as part of the Education and Training Foundation's Professional Development programme for Advanced Practitioners (#APConnect) 2018-2022 by delivery partner touchconsulting Limited. The toolkit comprises these cards, Guides, Practice-evidence and research reports; many of which are relevant to those leading provision in Further Education and Training.

YOU COULD USE THESE CARDS TO:

- develop self-awareness, analyse personal strengths and development needs
- facilitate self-assessment and improvement discussions with those you line-manage, colleagues and others
- support the development of those you line-manage, colleagues and teams that you are responsible for or/and work with
- provide thought pieces to help others reflect on and share their practise
- signpost to wider resources and evidence base
- add value to other professional development initiatives, e.g. coaching and mentoring programmes
- give structure to development interventions
- support the influencing of departmental and leadership teams
- support the implementation and teaching and learning approaches for new curricula, e.g. T levels
