

T LEVEL RESOURCE IMPROVEMENT PROJECTS (TRIPs)

FINAL OUTPUTS

Project Title: Return TRIP Up North

Lead Organisation: Middlesbrough College

Project start date: August 2021

Project finish date: March 2022

Description of the outputs

- Taxonomy of 'Employability Skills and Workplace Behaviours' - Childcare sector responses.

Sector use

1. The Childcare industry sector Taxonomy can be used by teachers to identify, design, structure and deliver activities to develop learners' workplace skills and general English, Maths and Digital competencies.
2. Teachers can design activities that meet individual criterion in each taxonomy or create more complex activities which tackle one or more taxonomic areas.
3. The taxonomies were created during the TRIP project following T Level learners' self-assessment, through an employer-led ranking exercise. Two, large Childcare providers were asked to rank the skills and behaviours attributed to learners as part of their self-assessment and were asked to rank them for their industry sector.
4. The Childcare Industry Sector Taxonomies are the outcomes of the two providers' rankings and include the four most frequently identified skills and behaviours.

Essential Employability Skills

All learners on work placement can ...

- * cope well with reading and writing tasks
- * cope well with number work

- * listen carefully to instructions
- * deal with people well even if shy

- * give an honest opinion when asked
- * are confident with people they've never met before

- * remember what they're told
- * respect others' opinions

Essential Workplace Behaviours

All learners on work placement are ...

- * pleasant and polite
- * able to enjoy learning new skills

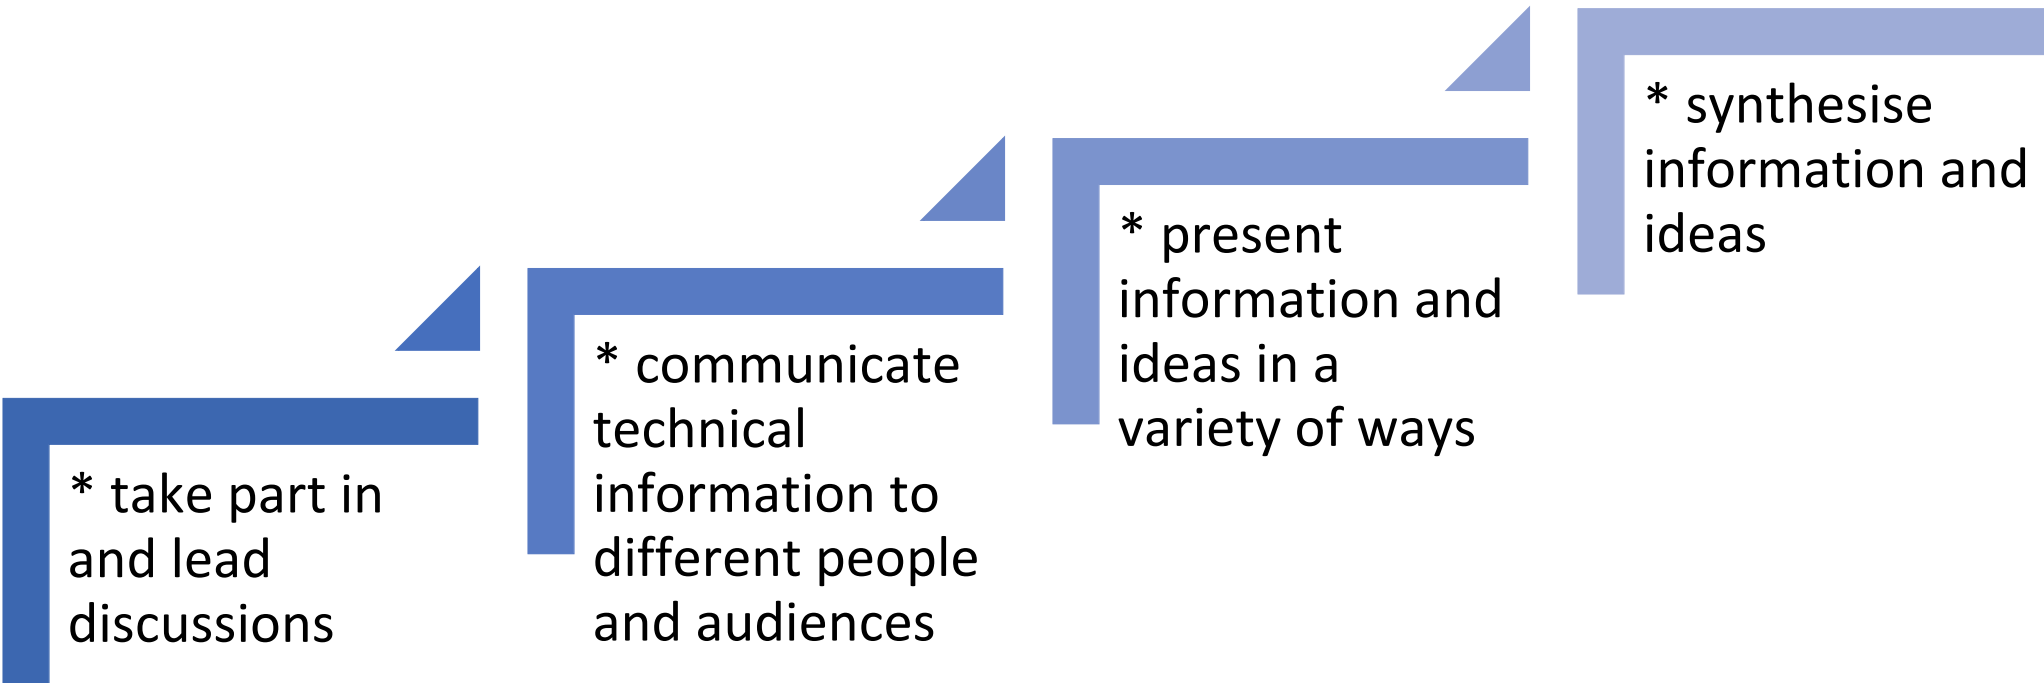

- * able to follow relevant health & safety
- * punctual

- * take pride in their appearance
- * able to keep going when something is hard to do

- * able to work under pressure
- * able to make decisions quickly

Essential English competencies

All learners on work placement can ...

* take part in
and lead
discussions

* communicate
technical
information to
different people
and audiences

* present
information and
ideas in a
variety of ways

* synthesise
information and
ideas

Essential maths competencies

All learners on work placement can ...

- * optimise work processes
- * work with numbers to cost a project

- * process data
- * communicate using mathematics

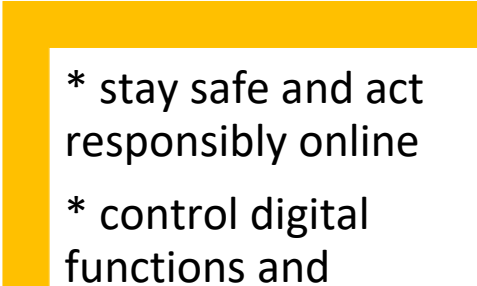

- * measure with precision
- * estimate, calculate and spot mathematical errors

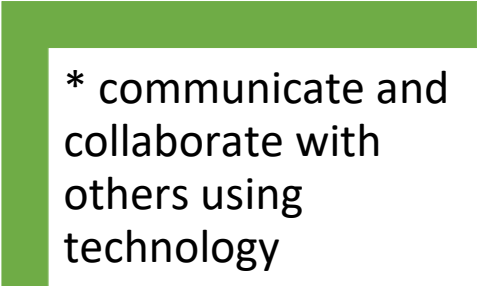

- * interpret and present numbers and data in different ways
- * use formulae and mathematical rules

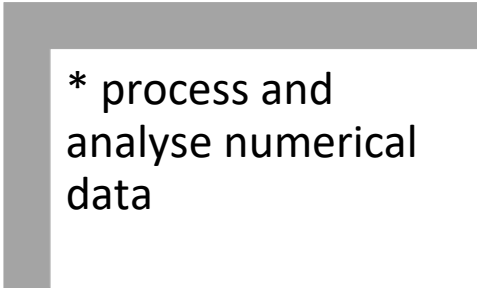

Essential Digital competencies

All learners on work placement can ...

- 
- * use technology and media effectively
 - * design, create and edit documents and digital media

- 
- * stay safe and act responsibly online
 - * control digital functions and equipment

- 
- * communicate and collaborate with others using technology

- 
- * process and analyse numerical data
