

Session 3: Learner activity 1

Access control task
Server room design

ETFOUNDATION.CO.UK

Learner activity 1: Server room design

You must design the security measures that will be implemented from an access control perspective.

Brief

A large organisation in the Midlands has a server room that needs security measures to be implemented. The current information about the server room is as follows:

- one door that leads to a main corridor within the building
- one window that leads out to the second floor
- no locks on the main door
- no permissions in place
- no access controls set up
- no authentication set up
- Only two technicians require access to the server room.
