

Party snacks

You are meeting up with some friends. Everyone is bringing something. You decided to make an avocado dip.

You need to buy the ingredients to make the avocado dip to serve with some tortilla chips and lemonade.

Use ratio tables to work out:

- the best value for the ingredients,
- the best value on tortilla chips and
- the cheapest lemonade by finding the cost per 100ml.

Avocado Dip

6 avocados

(packs of 3 – £1.80, packs of 2 – £1.50, – one avocado – 70p)

limes

(net of 5 – 85p, one – 18p)

Tortilla Chips

600 g tortilla chips (200 g – £1.20, 360 g – £2)

Lemonade

Lemonade (2 litres – £1.99, 24 x 330 ml – £7.50, 8 x 330 ml – £3.50)

Extension:

Each avocado weight 180 g if 90 g of avocado has a carbon footprint of 118.3 g. Use a ratio table to find out the total carbon footprint.
