

Handout 6

Exam question

Question 1

Work out $\frac{4}{5} - \frac{3}{8}$

Question 2

Gareth sells hot drinks.

He sells cups of tea, cups of coffee and cups of hot chocolate.

Of all the hot drinks he sold last week:

$\frac{2}{5}$ were cups of tea

$\frac{1}{3}$ were cups of coffee.

What fraction of all cups of hot drinks sold were cups of hot chocolate?
