

Bedroom Design

Task 1:

You are moving into a new bedroom and you have to design it with 6 items in the table.

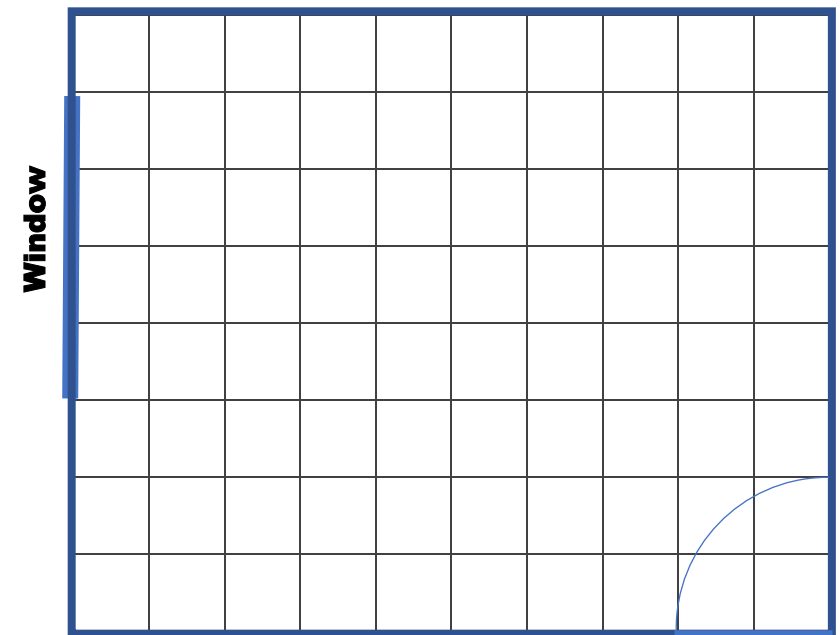

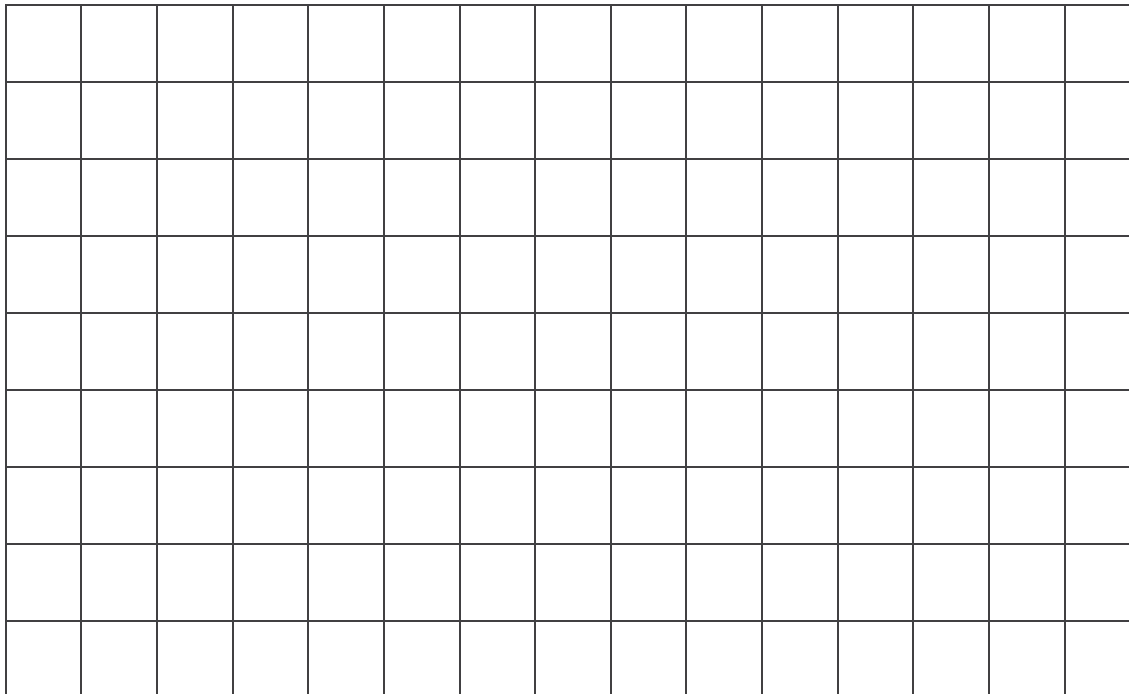

You really like looking out the window when you work so your desk needs to be by the window. You also don't want to cover up any of your rug – it's your favourite.

Draw the items on the plan of the bedroom below using the scale on the plan.

Make sure you leave space to move around!

Furniture	Length (m)	Width (m)
Double bed	2	1.4
Double wardrobe	1.8	1
Large desk	1.5	1
Bedside table	0.5	0.5
Large chest of drawers	1.4	0.5
Rug	2.0	1.75

Use this practice grid to draw furniture to scale before placing them in the blue square.

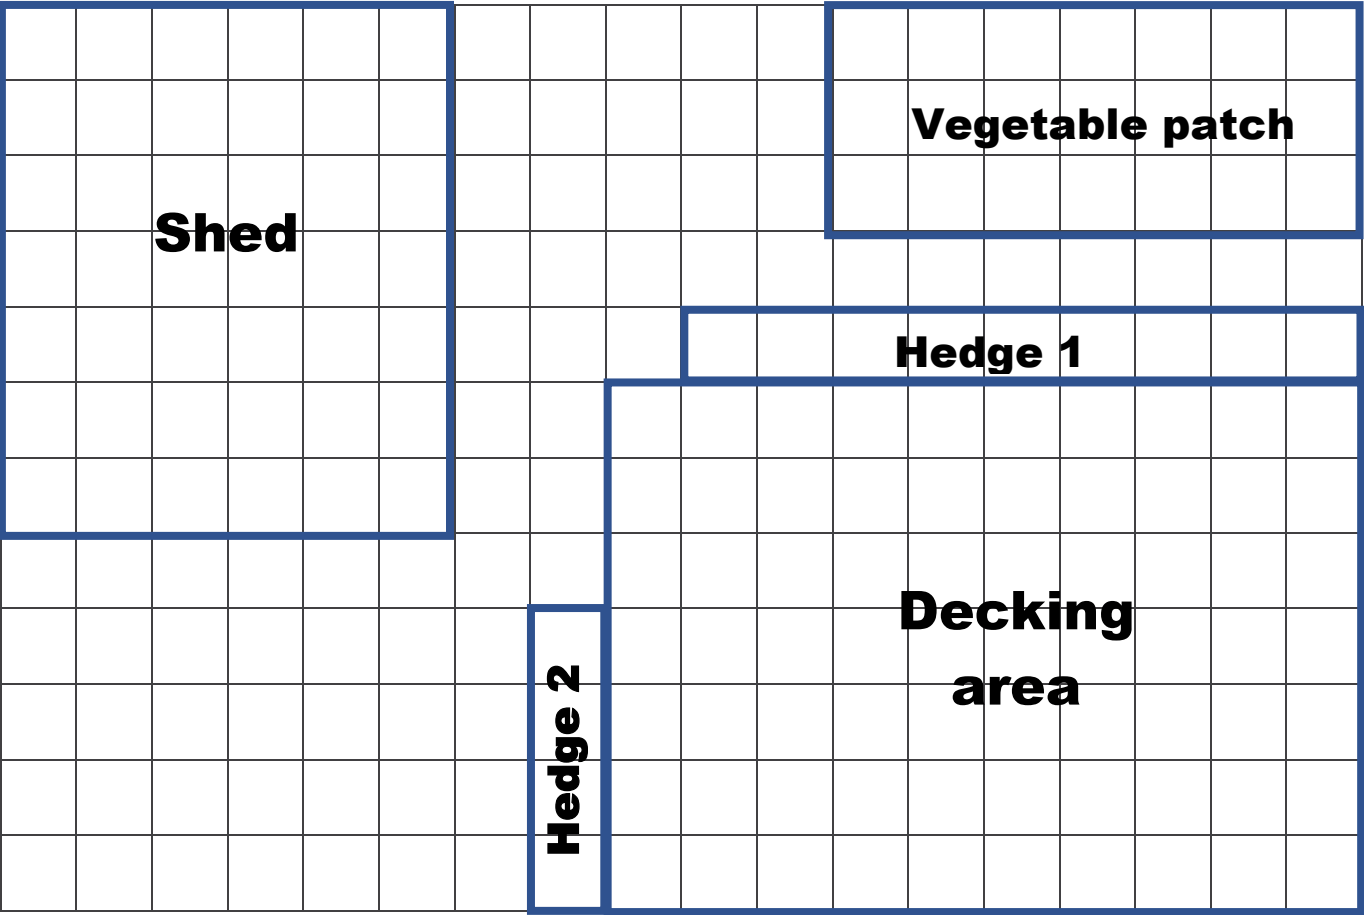

Scale 1 cm : 50 cm

Door

Task 2:

You have been given a plan of your new garden. Use the scale provided to work out the actual measurements of the features. Fill in the table with the real-life measurements.

Scale 1 cm : 25 cm

Garden feature	Real-life length	Real-life width
Decking area		
Shed		
Vegetable patch		
Hedge 1		
Hedge 2
