

Exam questions

Question 1

Alex is the manager of a hospital canteen.
He reviews the meals the patients choose.
On Monday there were 240 patients in total.

$\frac{1}{3}$ of these patients chose pasta.

$\frac{3}{8}$ of these patients chose beet stew.

The other patients chose chicken.

How many patients chose chicken on Monday?

Question 2

Work out $\frac{5}{8}$ of 320.
