Here are the ingredients needed to make a tray of 20 flapjacks:

200 g of margarine
250 g of oats
200 g of sugar
100 g of flour
3 tablespoons of syrup

Kelly needs to make 50 flapjacks for a party.
How much flour does she need?

No. of flapjacks	20	40	50	
Flour (g)	100	200	250	

Diagram illustrating the scaling process for flour:

- From 20 to 40 flapjacks: $\times 2$ (indicated by a red arrow above the table)
- From 40 to 50 flapjacks: $+10$ (indicated by a red arrow above the table)
- From 100 to 200 g flour: $\times 2$ (indicated by a green arrow below the table)
- From 200 to 250 g flour: $+10$ (indicated by a green arrow below the table)
