

Exam questions

Question 1

Joe works for a charity.

Each year the charity gives money to different projects.

The charity has a total of eight thousand nine hundred and sixty-eight pounds to give to the projects this year.

Joe needs to share the total money equally between 8 projects.

Work out how much money each project will receive.

Question 2

Charlie is a florist.

He cuts lengths of ribbon to go around vases.

Each length of ribbon must be 70 cm.

Charlie has a roll of ribbon which is 15 metres in length.

How many 70 cm lengths of ribbon can Charlie cut from the roll?
